ENTIGEST Program

European Project DO Impact
May 2025

Ampans is a foundation dedicated to the comprehensive care of people with disabilities, with sixty years of experience in this field. Located in Barcelona, Catalonia

The Special Work Centre (CET) has been expanding its business areas in order to provide employment opportunities for a greater number of people with disabilities.

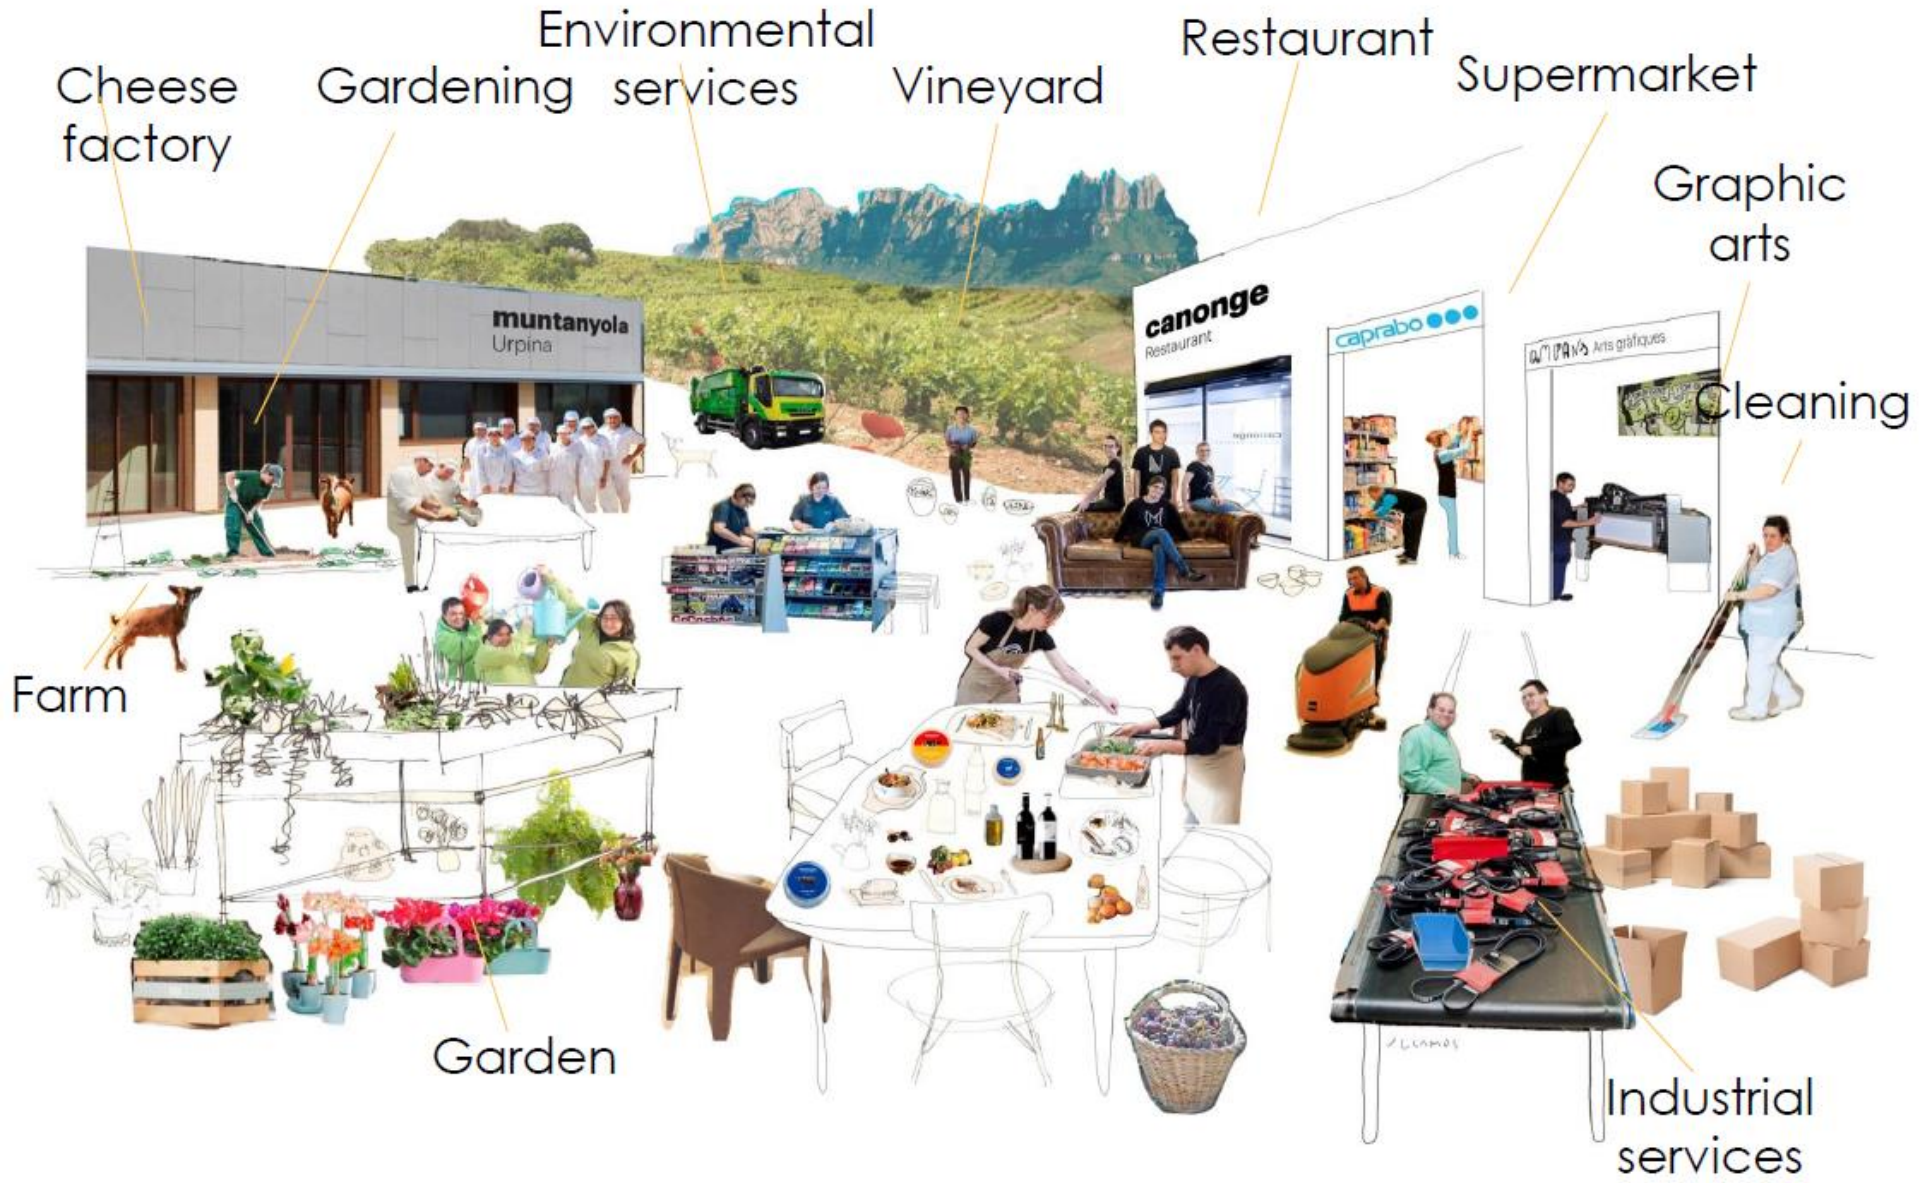
with the common denominator of offering the person a work environment and the support they need.

To date, more than one thousand people make up the total staff of AMPANS

Of the total number of workers, two hundred sixty-six are people with disabilities

SPECIAL EMPLOYMENT CENTER

AMPANS as an example



WATCH

The purpose is to develop tools that help us collect

DATA

And learn how to treat them to TRANSFORM people's

QUALITY OF LIFE

The evaluation of the data helps us to look,

allows us to stop, take stock and decide how to

CONTINUE

That's why we all need to have the same glasses

AMPANS

Summary

1. Need
2. Methodology
3. Participation
4. Commercialization
5. Results
6. Conclusions

AMPANS

1. About the Need

AMPANS

Having identified needs:

Innovation

Technology

Digitization

Quality

Efficiency

AMPANS

how to begin to develop ?

AMPANS

in-cuba

For us an important way is the co-creation

2. About the Methodology

STEPS

AMPANS :

- Hiring of a computer company, GMS, to develop computer software that would adapt to the needs of the Foundation. ALLIANCE

- Development the co-creation of the program. PARTICIPATION

- Progressive implementation at the Foundation. TRAINING

AMPANS

BEST PRACTICE

- Involve the professionals from the different Services/Centres in the design of the tool through Working Committees

- Training for all staff for the deployment of the tool. Led by the Quality Department

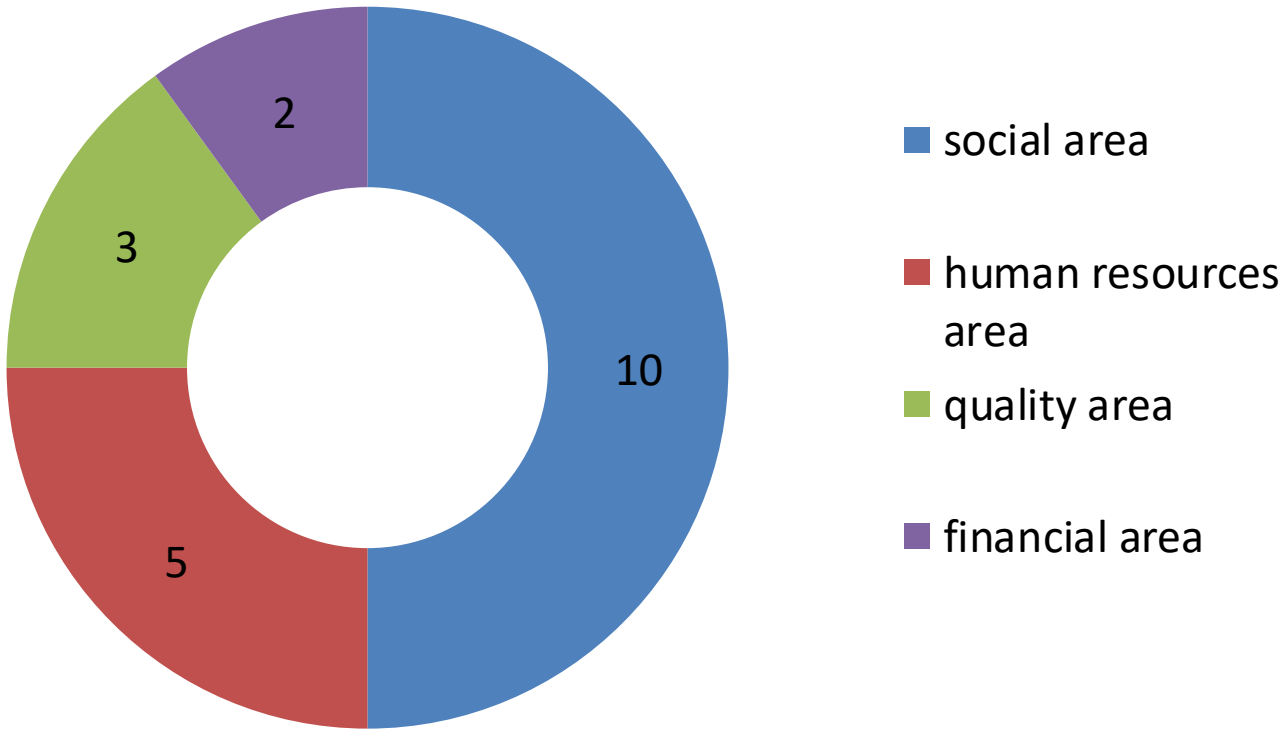
- Creation of a specialized figure in each service/center to evaluate new needs of the tool, collect team proposals, transmit the improvements/changes that are made

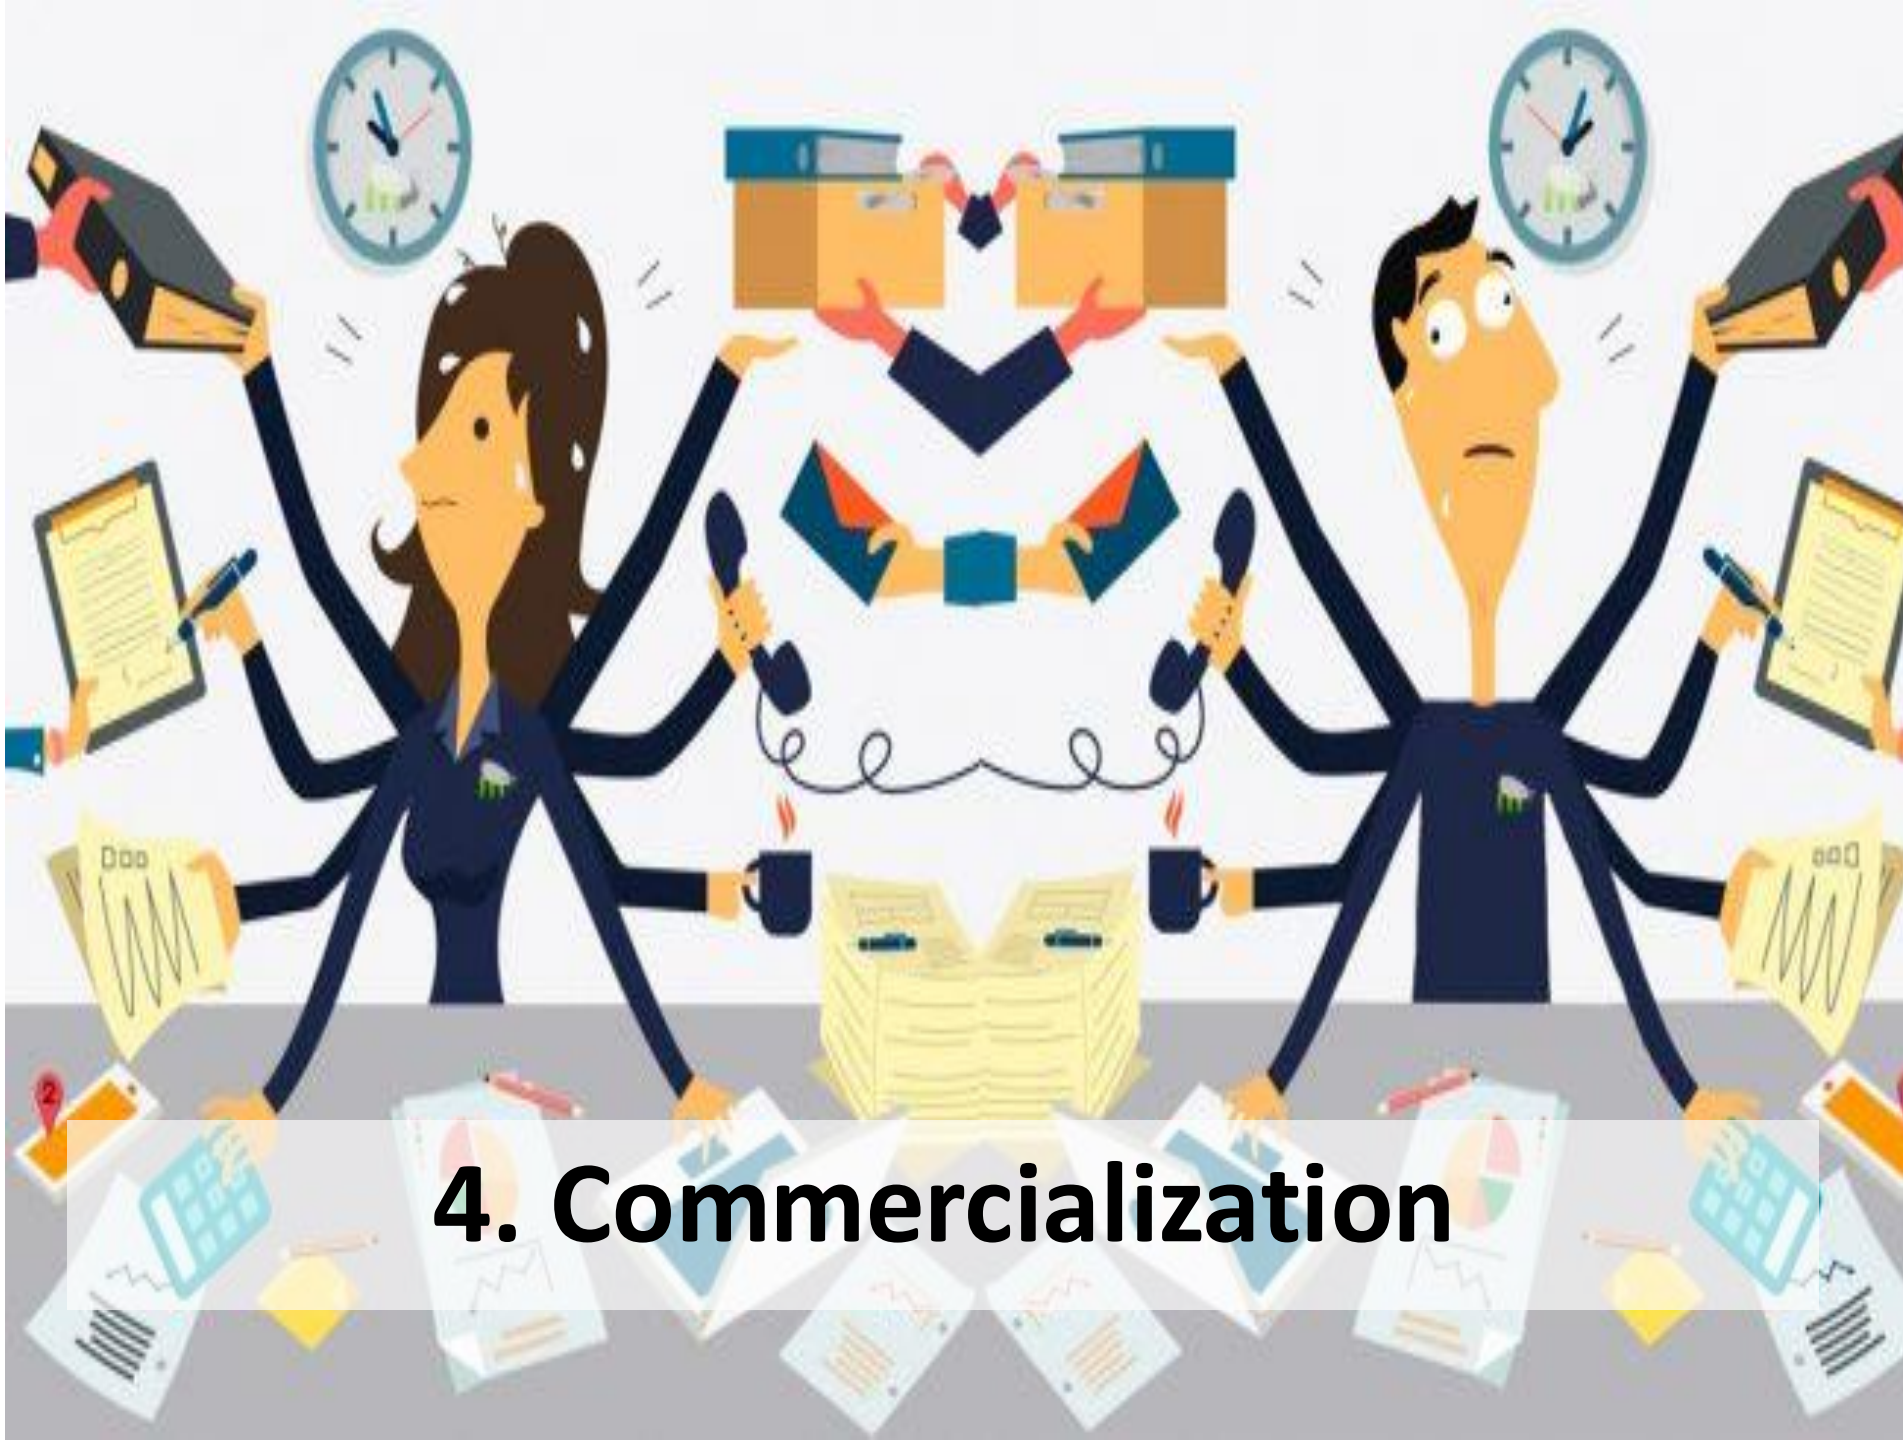
-The program is currently fed by many improvements proposed by the group of entities that use it

AMPANS

3. About the Participation

PARTICIPATION CO- CREATION PROGRAMME





4. Commercialization

1. Interest of other companies in the social sector in the "Entigest" program

2. Partial session of the program at the GMS company to finalize its development and commercialization.

AMPANS

5. About the Results

Consistently implemented and well integrated

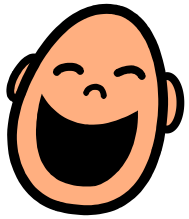
All the professionals of the Entity can consult the information and data of the person

Reports, records, indicators can be extracted that help us improve health, stability ,...

The tool is integrated into the quality processes of care

Everything is recorded in the history and the information isn't lost

AMPANS



Consistently implemented and well integrated

The tool allows you to create relationships and links between diferents modules: People, HR, Finance,... allows us a GLOBAL link

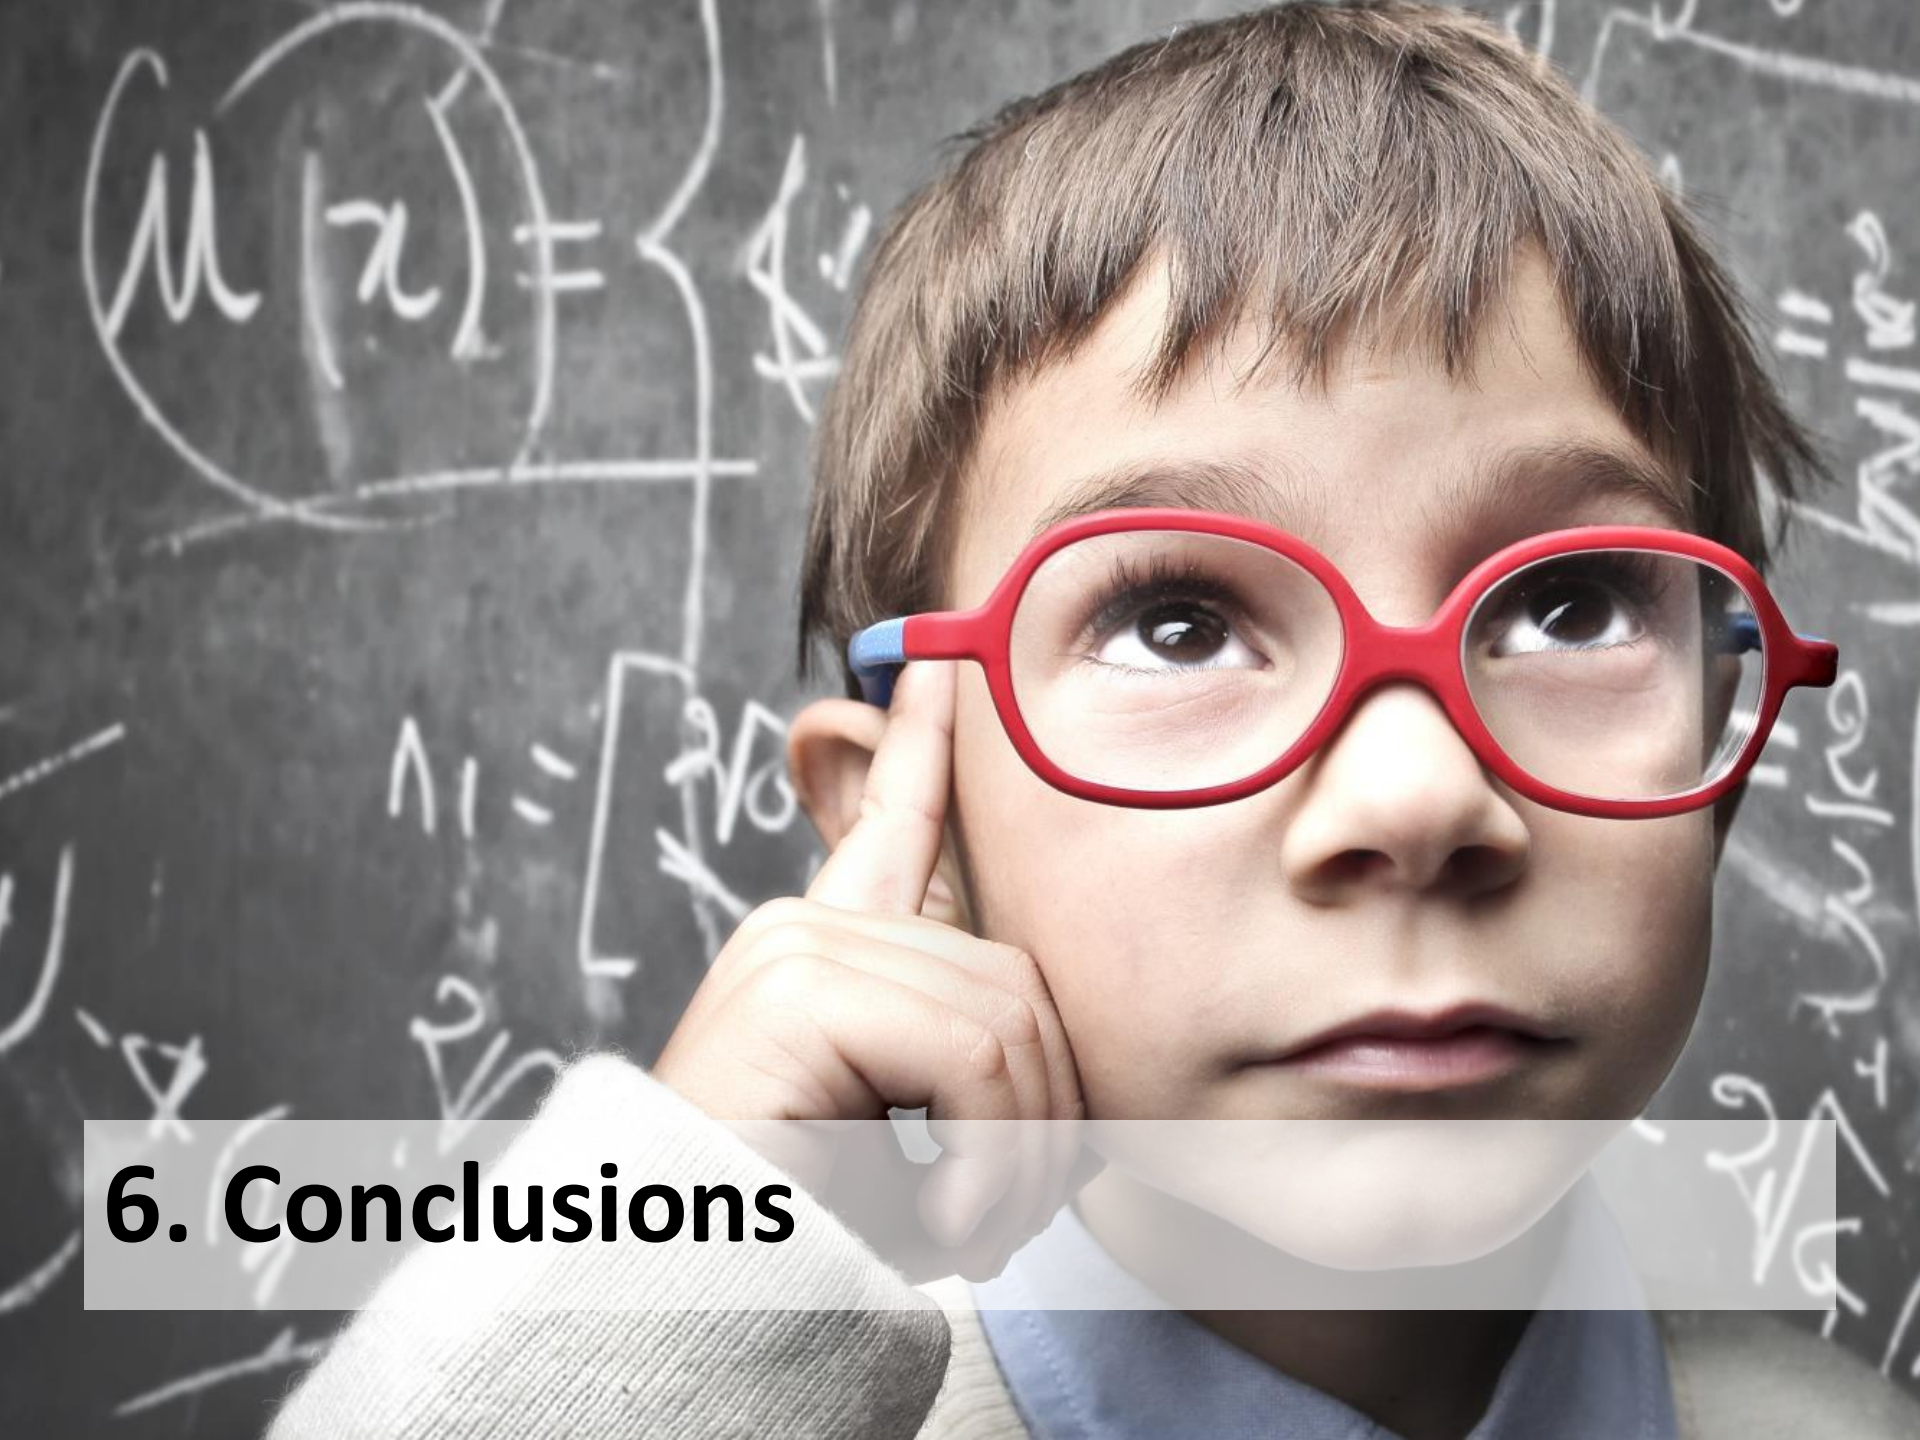
Human Resources module common to all workers (contract, calendar, job, overtime, leave, training, etc.

People module. Specific for people who receive support (individual programme, follow-ups, interventions, medication, benefits, etc.

New needs have led to having to extract unified data from the two modules and this has been done with a BI tool.

The tool also allows us to have information at the family level

AMPANS



6. Conclusions

The programme allows:

SHARE INDICATORS

PLAN/IDENTIFY NEEDS

ANALYZE AND MAKE DECISIONS

IMPLANTED METHODOLOGY OF CO-PRODUCTION

SOCIAL IMPACT OF RESULTS

IMPACT ON THE PEOPLE’s QUALITY OF LIFE

AMPANS
