## **Background information**

As part of the [DO Impact digital programme](#), an in-person workshop took place in Brussels, Belgium, on 25 November 2025, alongside 8 online Deep Dive sessions organised by Diesis Network.

These sessions are tailored to Social Economy SMEs aiming to enhance their digital and data-driven capacities through practical learning and peer exchange with a European focus. They will be held primarily in English.

Each Deep Dive and the Brussels workshop will explore a specific theme related to the digital transition of the Social Economy ecosystem, combining theoretical insights with interactive and experience-sharing sessions. The goal is to help European social enterprises unlock the potential of data and technology for social impact, policy influence, and inclusive innovation, while also providing a strong networking platform.

These activities form part of the broader DO Impact Strategy, which equips SMEs with the tools, knowledge, and resources needed to succeed in today's evolving market. The Deep Dives build on the DO Impact Learning Journey, introduce relevant digital tools, and spark exchange among participants.
