

The most complete
citizen participation tool
for an open, transparent
and democratic society.

People are stopping believing governance is theirs

Trust in local institutions is falling

From budget allocations to urban planning, residents feel decisions are pre-made, with consultation being just a formality.

The methods of democracy feel outdated

Public meetings, paper surveys, and town halls now exclude more people than they include.

Cities govern with a shrinking mandate

Fewer voices engaged, leads to less buy-in, lead to weaker policies: a cycle that is harder to break each time.

How do we make **our Mission** happen?

Our purpose is to help transform societies into **open**, **inclusive** and **democratic** living systems where every voice counts, governments act transparently, and in which together we shape a common future.

CONSUL DEMOCRACY

Introducing Consul Democracy

An infrastructure that keeps **developing**

Civic Assistant (AI)

- Administration assistant
- Image generation

Instant Translations

Translate in real-time the entire platform in 50+ languages

OpenID & SAML

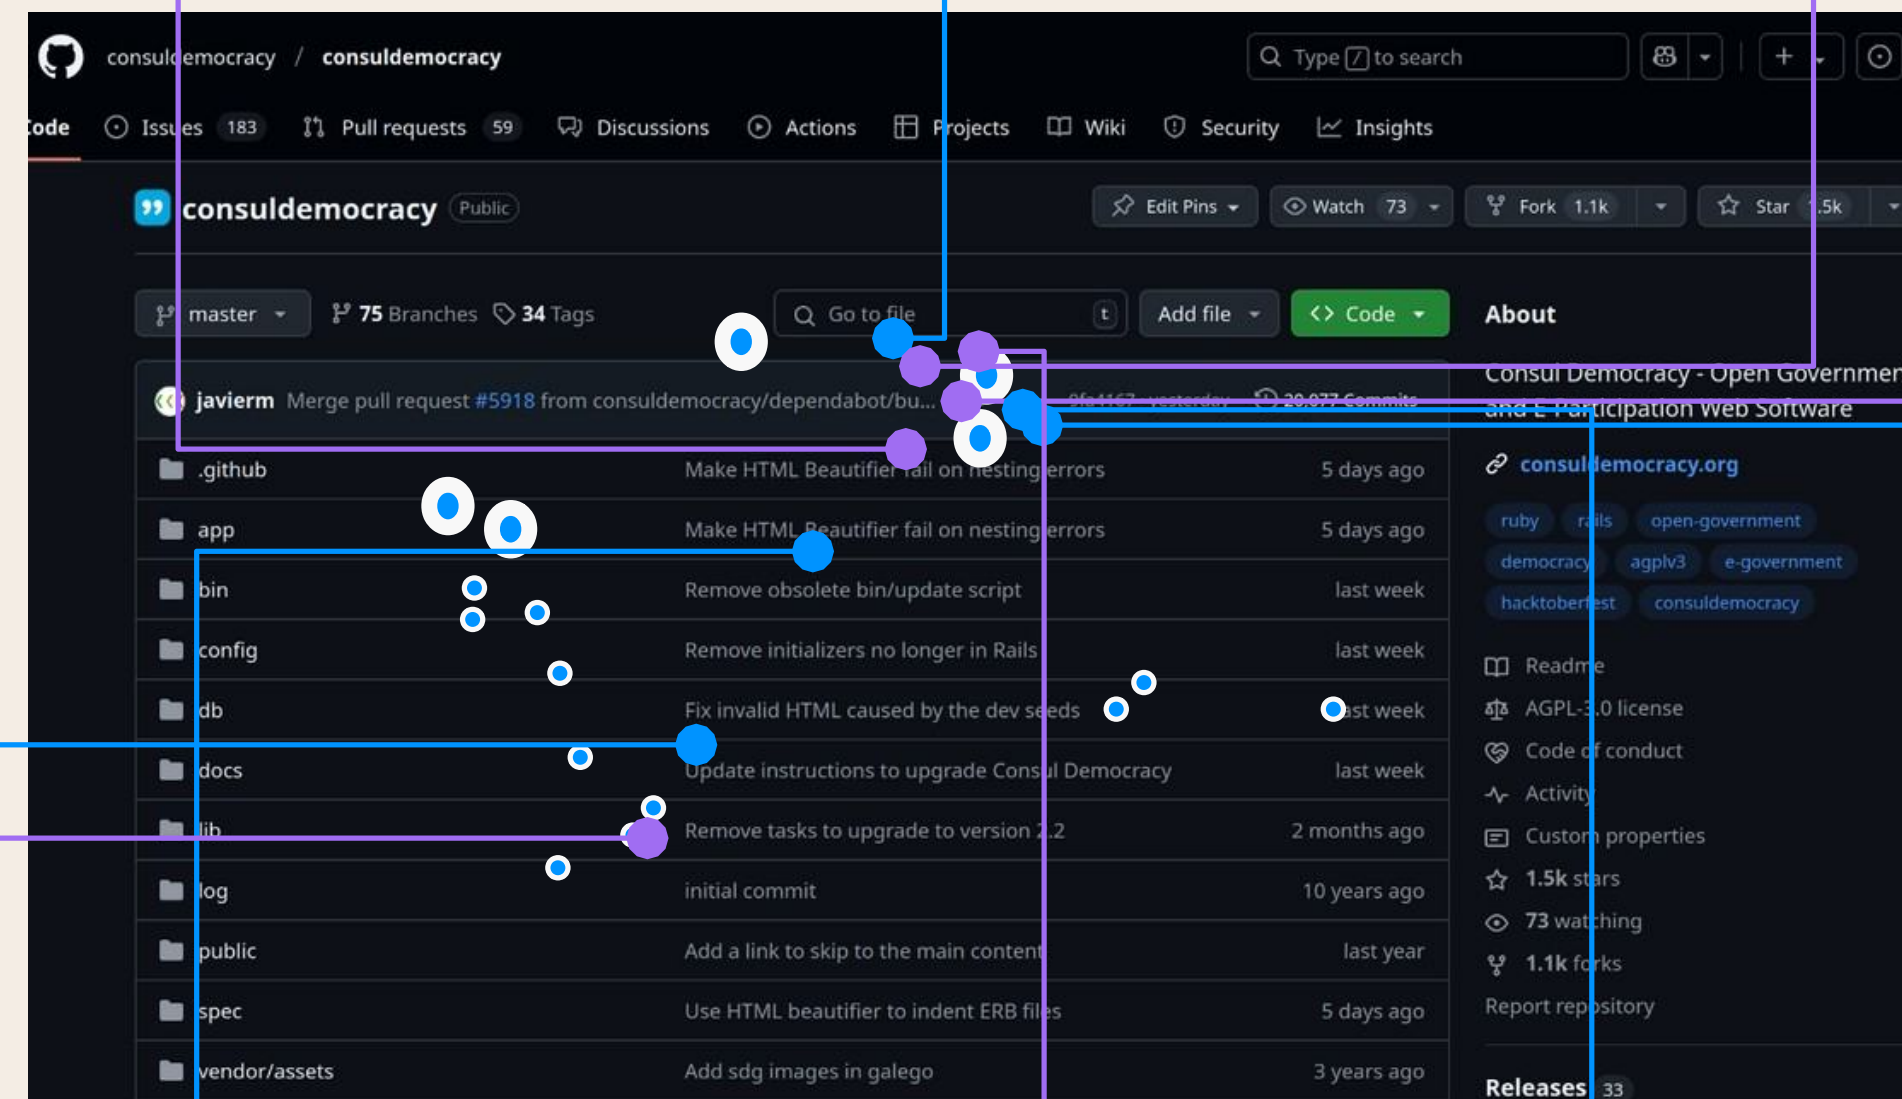

Integrate with existing authentication systems

Bidirectional API

- Alternative interfaces
- Institutional integrations
- Ecosystem integrations
- No-code workflows

Citizen Voice Input

Process vote, proposals and other input through voice

Multitenancy

Host multiple platforms within one single installation

Global ecosystem & impact 2015-2025

300+

Government or civil society users

800+

Participatory budgets completed
